matrix | pendix LED-module SunLike **NEW**

Based on the popular luminous colors “Ultra Blue White 1:1” and “Ultra Blue Red White” we have created the new “SunLike“-modules. Due to the integration of 25% “Seoul SunLike LED” in the white light area there is on the one hand an implementation of short-wave light (UV-A) and on the other hand this minimizes the dent between blue and green area.
